A Sixth Dynasty Stela from Abydos

Dr. Ahmed Hamdy Abdelmoniem
Lecturer of Egyptology, Faculty of Arts,
Alexandria University
Abstract:

The limestone stela described in the following pages is currently located in the Cairo Museum under the number CG 1579 and SR 2/15196, it belongs to an official named Ni-Pepy.

The stela most probably was from his tomb which was likely located in the middle necropolis of Abydos\(^{(1)}\), although the stela was mentioned by Mariette\(^{(2)}\), Sethe\(^{(3)}\) and Borchardt\(^{(4)}\), it was never published fully before.

Description:

It is a rectangular limestone stela measuring 130 c.m high, 67 c.m in width and 14 c.m in thickness, it is in a good state of preservation with a slight fraction in its lower right side, no remains of colours can be recognized. All the texts and the figure of the owner of the stela Ni-Pepy are all well incised\(^{(5)}\).

The stela is divided into three parts, the upper one is dominated by five lines of inscriptions where the signs are oriented from right to left, the lower-framing line of these five lines of inscriptions delineates the upper part of the stela from the lower two parts.

As for the lower two parts, they consist of a left part, which is much larger than the right one, where it shows the stela’s owner standing in the addressing posture\(^{(6)}\), where he is acting in the pose of speech\(^{(7)}\). He appears barefooted wearing a short knee length kilt\(^{(8)}\) tight at the waist with a triangular front projection, his left leg is extended forward, he is wearing a broad collar in his neck and two bands in his wrists. The face of the deceased is destroyed with some exceptions can hardly observed as the nose, the earlobe and the lips\(^{(9)}\), his head is covered with a shoulder length wig leaving the ear uncovered\(^{(10)}\), whilst the right part of that lower section of the stela displays only two vertical columns of inscriptions, in which the signs are directed from right to left, these two vertical lines include in each two titles for Ni-Pepy.
Text and Translation:

(a) The horizontal five inscriptions:

Translation:

(1) O, the living ones upon the earth, (men) servants like me (2) shall they be (in) the accompany of the god (3) Shall they say (utter) a thousand loaves of bread, a thousand jars of beer, a thousand of bull, a thousand of fowl to (4) “True count”, “gracious of arm”, “director of the two thrones”, “controller of the black jar”(12), (5) “Sole companion”, “keeper of the headdress”(13), Ni-Pepy.
(b) The vertical two Inscriptions:

\[
\text{shd } hm(w)-ntr \text{ Mn-nfr-Ppy } \text{ htmty-bity } \text{ shd } hm(w)-ntr \text{ Hf-nfr-Mr-n-} \\
\text{ pr-r } \text{ imy-r } \text{ pr-nswt}
\]

Translation:

(1) “Inspector of \text{hm-ntr} priests of the pyramid of Pepi I”, “sealer of the
king of Lower Egypt”\(^{(14)}\), (2) “Inspector of \text{hm-ntr} priests of the
pyramid (the perfection – of – Merenre – appears – in Glory)”,
“overseer of the king’s domain”\(^{(15)}\).

The Commentary:

(A) The Name and Titles of \text{Ni-Ppy}:

The name \text{Ni-Ppy} was known since the Old Kingdom\(^{(16)}\), Ranke
translated it by “the one who belongs to (king) Pepi”\(^{(17)}\), Kuraszkiewicz
noted that there were three individuals bore the name of \text{Ni-Ppy} in the
Old Kingdom, two of them came from the Memphite necropolis
nearby Pepy II’s pyramid\(^{(18)}\) while the last one was buried in
Abydos\(^{(19)}\). By the end of the Old Kingdom the private names which
were incorporated with the names of the kings were very common\(^{(20)}\).
The stela presents ten titles held by Ni-Pepy during his long career, which are arranged in alphabetical order as follows:

1. $\textit{im}\textit{3}^{-}\textit{c}$ (gracious of arm)\(^{(21)}\).
2. $\textit{Imy-}\textit{r pr-nswt}$ (overseer of the king’s domain)\(^{(22)}\).
3. $\textit{Try nfr-h3t}$ (keeper of the headdress)\(^{(23)}\).
4. $\textit{h3ty}^{-}\textit{c} m3^{-}\textit{c}$ (true count)\(^{(24)}\).
5. $\textit{hrp} nsty$ (director of the two thrones)\(^{(25)}\).
6. $\textit{hrp} h3ts km$ (director of the black jar)\(^{(26)}\).
7. $\textit{htmty-bity}$\(^{(27)}\) (sealer of the king of lower Egypt)\(^{(28)}\).
8. $\textit{Smr-wcty}$ (sole companion)\(^{(29)}\).
9. $\textit{shd} hm(w)-ntr Mn-nfr-Ppy$ (inspector of $\textit{hm-ntr}$ priests of the pyramid of Pepi I)\(^{(30)}\).
10. $\textit{shd} hm(w)-ntr H3^{-}nfr-Mr-n-Rc$ (inspector of $\textit{hm-ntr}$ priests of the pyramid of Merenre)\(^{(31)}\).

\(\textit{im}\textit{3}^{-}\textit{c}\): Wörterbuch read the title as $\textit{im}\textit{3}^{-}\textit{c}$\(^{(32)}\), Gunn and Helck translated it as “agreeable hand”\(^{(33)}\), while Jones translated it as “gracious of arm”\(^{(34)}\).

It was known since the reign of king “Den”\(^{(35)}\), by the time of the second dynasty it was linked with the court\(^{(36)}\), it continued in use thereafter where it sometimes appeared during the fourth and early fifth dynasties\(^{(37)}\), but by the second half of the fifth dynasty and during the sixth dynasty it became of high consideration\(^{(38)}\).

Altenmüller noted that it was a regular court office\(^{(39)}\), Strudwick presented a table of twenty $\textit{im}\textit{3}^{-}\textit{c}$ who carried the title during the Old Kingdom, seventeen of them came from the Memphite necropolis, while three were buried in the provinces\(^{(40)}\).

For the meaning of that title and so determine the functions of its holder, it is noticed that it consists of two components, the ideogram $\text{im}^{(41)}$ which is read as $\textit{im}\textit{3}$ or $\textit{i3m}$\(^{(42)}\) and translated as “kind” or “gracious” or sometimes as “favorite”\(^{(43)}\), while the other component is the unilateral sign $\text{r}$ which means hand or arm\(^{(44)}\) or “assistant” when it was involved in titles\(^{(45)}\).
It is worth commenting that the *im³/l³m* tree was mentioned in the Pyramid Texts where it attends, serves and supplies the dead king with all his provisions in the afterlife\(^{(46)}\) and later the Coffin Texts confirmed the same role for that tree\(^{(47)}\).

Consequently, it was a divine tree which guaranteed protection and supplies for the king in the afterlife, and since the king’s afterlife is a reflection of his earthly ideas and life, so it would be acceptable that *im³-* was a person who offered protection and provisions for the living king, as he performed the role of *im³* tree but in the real life.

Thus the *im³-* was a court title – as Altenmüller mentioned before – but of high status that was confirmed by the fact that twelve of the twenty holders of the title were vezirs\(^{(48)}\) and the title’s holder, Ni-Ppy in our case, was responsible for serving and attending to the living king.

\(\text{(2) } \text{Imy-r pr-nswt:} \text{ the holder of that title was in charge of managing and administrating the royal palace}\(^{(49)}\), the title was found in the titularies of many officials in the Memphite necropolis as the vizier \(Hnty-k³i / l³h³t\)\(^{(50)}\) and in the provinces as \(Ni-Ppy\) of Abydos\(^{(51)}\) and \(Im-htp\) of Sheikh-Said\(^{(52)}\).

\(\text{(3) Iry nfr-h³t:} \text{ is a court title indicates an office related to the king’s headdress}\(^{(53)}\), Wörterbuch mentioned that the word \(nfr-h³t\) means diadem\(^{(54)}\), thus it was a headdress other than a wig\(^{(55)}\), it might be a knotted head band or headdress, this meaning is proved by a New Kingdom text where the verb \(ts\) was followed by the determinative \(^{(56)}\) which indicates a headdress.

The role of the holders of *Iry nfr-h³t* is to be a keeper of the royal headdresses including wigs, their keeping, storage as well as the responsibilities of adorning the head of the sovereign as reflected from title *iry nfr-h³t m shkr Ḥfr*\(^{(57)}\).

Although the title was a court title, it was attested also in the provinces as: *Ni-Ppy* – the stela’s owner –, *k³i-hb / Tti* of Akhmim\(^{(58)}\), *Ppy-²nh-hry-ib* of Meir\(^{(59)}\) and *I*p of elsaff\(^{(60)}\).

\(\text{(4) h³ty-* m³*:} \text{ It was known since the time of Unis till the end of the Old Kingdom}\(^{(61)}\). Different opinions were raised concerning the
addition of $m^3c$ as an adjective subsequent to titles, Wörterbuch and Edgerton mentioned that it shows that the job was actually practised\(^{(62)}\), Kanawati suggested that it might reveal a degree of superiority or significance for the title’s holder\(^{(63)}\), whilst Gunn, James and Fischer believed that such addition did not reflect any significance or status for the holder of the title\(^{(64)}\), this office was the higher rank held by $Ni-Ppy$ in his long career track.

\((5)\) $hrp\ nsty$: This court title is composed of two words: $hrp$ which means “director”\(^{(65)}\) and $nsty$ which means the “two thrones”\(^{(66)}\). Gardiner believed that the two thrones referred to the two seats in which the king and queen sat on during taking their meals with each other in the palace\(^{(67)}\).

Although the title was held by viziers in the middle of the fifth dynasty\(^{(68)}\), Both Gardiner and Helck supposed that it was a middle rank performed by the servants of the royal palace\(^{(69)}\), it may be one of the primary offices carried out by $Ni-Ppy$ in his early career path.

\((6)\) $hrp\ h^3ts\ km$: The title was known since the late of the fourth dynasty\(^{(70)}\) and continued in use till the end of the Old Kingdom in the Memphite Capital and in the provinces as well\(^{(71)}\).

The word $h^3ts\ km$ which means the black jar was likely referred to the jar of wine\(^{(72)}\). It is worth commenting that the title $hrp\ h^3ts\ km$ and the previous title $hrp\ nsty$ were always frequently found together with each other\(^{(73)}\), which led Gardiner to note that both titles were connected with the royal table\(^{(74)}\), thus the $hrp\ h^3ts\ km\ s$ were most probably in charge of pouring wine to the royal couple during taking their meals.

\((7)\) $htmty\-bitiy$: It was first known since the archaic period\(^{(75)}\) and continued in use till the end of the Old Kingdom\(^{(76)}\).

The title was widely spread in the Old Kingdom in both the Memphite necropolis and the provinces as well\(^{(77)}\), this is due to the urgent need for the king and the state to store different kinds of raw materials and food in all the provinces.

These different kinds of raw materials and food were stored and secured in large stores with the supervision of the local chief\(^{(78)}\), such
great responsibility on local chiefs made the office and services of ḫtmty-bity always required\(^{(79)}\).

Consequently, as ḫty-\(\text{m}\) and ḫtmty-bity, Ni-Ppy was in charge of all the stores of raw materials and food in the eighth nome of Upper Egypt (Abydos).

\((8)\) \textit{smr-w\(\text{cty}\)}: It was known since the fourth dynasty particularly since the time of Cheops as it was held by \textit{Ḥm-Iwnw}\(^{(80)}\) and continued in use till the end of the Old Kingdom in the Memphite capital as well as the provinces\(^{(81)}\).

The title \textit{smr-w\(\text{cty}\)} was much debated amongst scholars, some suggest that it was a honorific title that only reflected the standing of its holder and his relationship with the sovereign\(^{(82)}\), Fischer noted that it was the lowest of the titles of rank\(^{(83)}\) without referring to a particular task that a \textit{smr-w\(\text{cty}\)} could execute, while the royal decrees revealed that \textit{smr-w\(\text{cty}\)}s might have carried out the responsibilities of the royal envoys\(^{(84)}\). Consequently, it was a real office with specific tasks performed to the sovereign, it also shows the position gained by \textit{Ni-Ppy} from his sovereign.

\((9)\) \textit{Sḥd ḫm(w)-ntr Mn-nfr-Ppy} \((10)\) \textit{Sḥd ḫm(w)-ntr ḫ-nfr-Mr-n-R\(\text{c}\)}

\textit{ḥm(w)-ntr} were one of the temple Phyles which involved beside them other staff and personnel as \(w\text{-ḥbt} \textit{ḥry(w)-ḥbt} \textit{ḥnty(w)-š} \textit{dt} \textit{servants}\(^{(85)}\), each of them carried out specific tasks in the temple.

Both \textit{ḥm(w)-ntr} and \(w\text{-ḥbt} \textit{ḥry(w)} \textit{ḥnty(w)-š} \textit{dt} \textit{servants}\(^{(85)}\) priests were responsible for the recitation of the daily rituals and the monthly activities\(^{(86)}\), As for \textit{Ni-Ppy} who was \textit{sḥd ḫm(w)-ntr} he presided all these temple Phyles in both cult temples of Pepy I and Merenre I\(^{(87)}\).

According to Muhs these several temple staff and personnel served only for a month in ten, this enabled them to be assigned in more than one mortuary temple\(^{(88)}\), as in case of \textit{Ni-Ppy} who performed the task of this office in both mortuary temples of Pepy I and Merenre I, It is worth to note that such office \textit{sḥd ḫm(w)-ntr} was not linked with gods’ temples before the Middle Kingdom\(^{(89)}\).
(B) Dating Criteria:

The stela shows some artistic and epigraphical features which help to assign and determine a particular date for it:

As for the Artistic Features of dating:

(1) The stela presents many artistic features which represent the second Old Kingdom style, this style which began since the time of Pepy I till the end of the Eighth dynasty as: the shoulder length wig that leaves the ear uncovered, the broad collar which was worn by the deceased around his neck, the positioning of the earlobe of the deceased on the same line with the bottom of the nose and the depicting of the ears of the deceased precisely vertical without any bending.

(2) The deceased is depicting in the addressing posture, which is known by the early of the fifth dynasty, but it became familiar during the sixth dynasty.

As for the epigraphical and textual features of dating:

(3) The stela shows some epigraphical and textual features which characterized the end of the Old Kingdom as: the appearance of the suffix (.sn), in the second and third horizontal inscriptions, without the plural signs (I I I) is a frequent feature until the twelfth dynasty.

(4) The appearance of the title shd hm(w)-ntr + royal pyramid complex, is not frequent after the middle of the sixth dynasty in the provinces.

(5) The stela displays the formula of “addressing to the living”, in the first horizontal line of the stela’s inscriptions, in which the deceased asked the passer – by to recite the food prayers, which appeared in the third line of the stela, the formula in that situation began from the last years of Pepy I’s reign, flourished by the time of Merenre I and continued in that status during the reign of Pepy II and thereafter.

(6) The name Ni-Ppy appeared twice only in the Old Kingdom beside the owner of the current stela, both of them were buried nearby Pepy II’s pyramid in the Memphite necropolis.
Conclusion:

(1) The titles held by *Ni-Ppy* reflected that he began his long career track in the Memphite residence, where he served in the royal palace as reflected from titles (1), (2), (3), (5), (6) and (8), at the same time he served as an inspector of the *hm-ntr* priests in the mortuary temples of both kings Pepy I and Merenre I, then after a long time in serving the king, *Ni-Ppy* was appointed as a true count for Abydos as reflected from title (4) and as a part of his responsibility in Abydos to guarantee the security of the stores in the eighth nome he held the title *htmy-bity* (7).

(2) *Ni-Ppy* was very trusted by the king that allowed the latter to select him from a high court official to be appointed as the count of Abydos which was the center of the royal administration in Upper Egypt throughout the Old Kingdom.

(3) The titles (1) and (3) show the direct and intimate relationship between *Ni-Ppy* and the sovereign.

(4) Most probably *Ni-Ppy* was “overseer of the king’s domain” before he was appointed as count of Abydos where the stela was discovered.

(5) Baer suggested a very wide date for *Ni-Ppy* which started from the reign of Merenre I to the end of the Eighth dynasty, but according to the previous mentioned dating criteria, it is clear that the stela is a sixth dynasty stela, but as reflected from (B1) the stela might be dated by the time of Pepy I to the end of the Eighth dynasty, but as (B6) shows that the name *Ni-Ppy* appeared twice in the Memphite necropolis both came from nearby the pyramid of Pepy II, also (B5) indicates that the formula was introduced since the late years of Pepy I, flourished by the time of Merenre I and continued in the reign of Pepy II, in addition to (B4), so the stela is not earlier than the last years of Pepy I and not later than the middle of the sixth dynasty, if one adds in consideration the two titles (9) and (10) where *Ni-Ppy* acted as inspector of *hm-ntr* priests in the mortuary temples of Pepy I and Merenre I, so I suggest the
dating of the stela by the reign of Merenre I to the early years of Pepy II and that *Ni-Ppy* might be contemporary to the sovereigns Pepy I, Merenre I and the early years (First quarter) of Pepy II.
